

# Carbon Budgets Modelling Workshop Session 1: Closing Summary

18<sup>th</sup> October 2022

CLIMATE CHANGE ADVISORY COUNCIL

## Modelling & Development of the 1<sup>st</sup> Programme of Proposed Carbon Budgets

- Modelling of carbon budget scenarios was carried out by three groups;
  - 1. University College Cork (UCC) TIMES Ireland Model (TIM),
  - 2. Teagasc Food and Agriculture Policy Research Institute (FAPRI) Ireland model, and
  - 3. University of Limerick (UL) Goblin model.
- Different levels of mitigation in the broader energy sector (electricity, heat, transport and industry) were modelled by TIM.
  - Different levels of mitigation effort were modelled in the agriculture and land use sector by both the Teagasc FAPRI-Ireland model and the Goblin model.

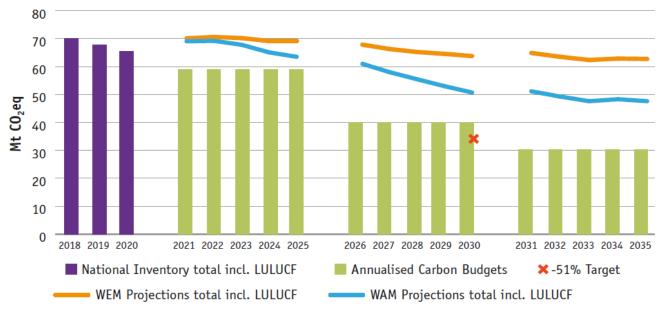

#### **Carbon Budgets and GHG Projections**

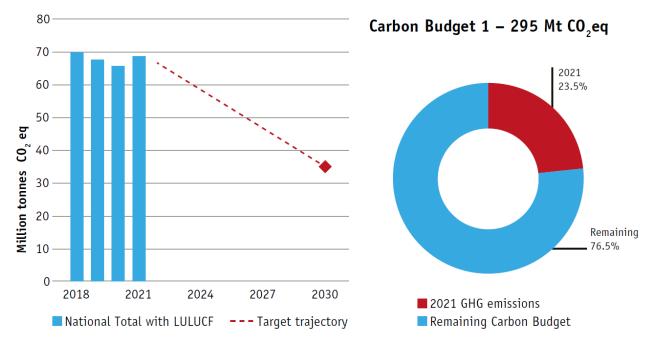

The agreed Carbon Budgets in the context of recent historic emissions and projected emissions data (Mt CO<sub>2</sub> eq) (including LULUCF) under the '*With Existing Measures*' and '*With Additional Measures*' scenarios

Figure 2, Ireland's Greenhouse Gas Emissions Projections 2021-2040 (EPA June 2022)

#### **Carbon Budgets and GHG Inventories**

Provisional National total emissions for 2021 (69.29 Mt  $CO_2eq$ ) have used 23.5% of the Carbon Budget for '21-'25 (295 Mt  $CO_2eq$ ), leaving 76.5% of the budget available for the succeeding four years, requiring an 8.4 % average annual emissions reduction from '22 – '25 to stay within budget

Figure 3, Ireland's provisional Greenhouse Gas Emissions 1990-2021 (EPA July 2022)

## 2<sup>nd</sup> Carbon Budget Programme (2022 – 2024) High Level Workplan

- Carbon Budgets modelling workshop to consider and review the evidence required and the analytical tools available for the 2<sup>nd</sup> Carbon Budget Programme.
- Macroeconomic analysis will need to be developed further for the the 2<sup>nd</sup> Carbon Budget Programme in order to assess the impacts of the transition.
- The CCAC will submit analysis requests to relevant Government Departments and Agencies in line with the provisions of the MoU.
- > Establish a Carbon Budgets Working Group to inform the planning and development of modelling scenarios.
- A period of scenario modelling during Q4 2023 Q3 2024 to inform proposals for the 2<sup>nd</sup> Carbon Budget Programme is anticipated.
- The CCAC is required to prepare and agree the final proposal for Carbon Budget 3 (2031 2035) and to develop the provisional proposal for the Carbon Budget 4 (2036 2040) for submission to the Minister of Environment Climate and Communications by Q4 2024.

## Breakout Session 1: Sequencing of programme of work for carbon budget

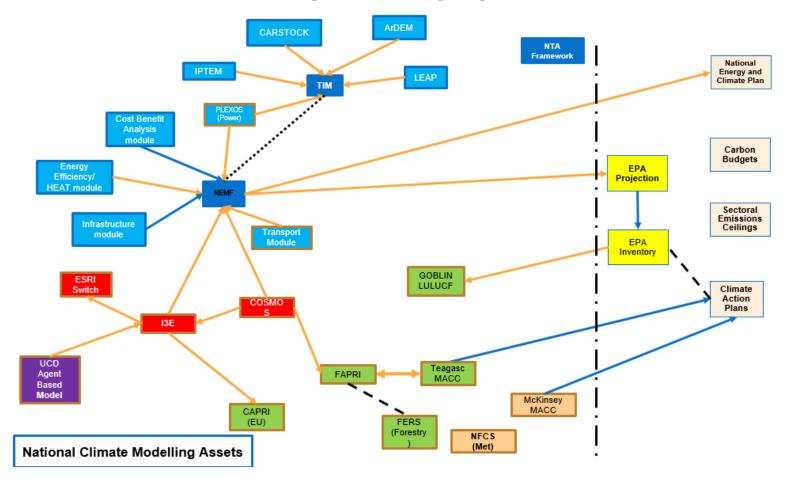

#### Key Inputs:

- Engagement with modelling experts
- Modelling requests under MoU
- New Carbon Budgets Working Group
- Contracted support and research for modelling and in other areas
- Inventories and projections
- Relevant research and pathways assessments
- Scenario questions, modelling inputs and modelling analysis

#### **Breakout Session 2: Model Integration/Coupling**

# Joining details for Session 2 (11:45-13:35)

You have received a calendar invite with the link to register for this meeting. Please note you will need to register in order to receive the link to join Session 2.
